Please provide a brief summary of main points for the issue/concern: *

We are concerned that not a fair sample of evidence is being considered when making decisions about the adverse vs perceived positive effects of putting small children in masks. I am not a scientist but there are certainly many out there citing studies contrary to those being referenced by Health Canada. Please do not have this go on any longer than it has to. The children are suffering - this I know first hand. Take the masks off our children.

Recommendation(s) for resolution of issue: *

Lift the requirement of masks in primary schools.
