

Name: Nick Morabito

Summary of main points for the issue/ concern:

I would like to bring up some concerns that I have as a parent of four children currently enrolled in schools in the school board.

These concerns are surrounding inclusivity policies.

My thoughts and points:

- ensuring that the inclusivity policies are working effectively and helping defuse conflict and bullying
- ensuring that the safety and mental health of all student's is paramount, and that marginalized groups are not made victim to frustration or misunderstandings
- some of my own experience with motivating parents to get involved in helping with these often misunderstood challenges as well as the policies being created to equalize and promote inclusivity.

Recommendation(s) for resolution of issue:

- Increased parental and guardian involvement, which would create a more agreeable environment, with less surprises.
- Creating vehicles for collecting parental and guardian input
- I am offering my time and effort to assist
