

Name: Sarah Smith

Brief summary of issue or topic of discussion:

I am requesting an opportunity to share and express my deep concerns regarding the proposed elementary review plans. The plans when I first emailed our Trustee to discuss she responded "yikes, this must be a computer glitch". It's very clear to everyone that these plans have failed to consider the serious hardships and stress they are already causing for families like mine. Under the current proposal, my two elementary-aged daughters—who should be able to grow and learn together—will instead be separated into two different schools, on two different schedules, for no justifiable reason. The impact on my family is enormous. Beyond the logistical challenges, this separation creates unnecessary emotional distress for my children, disrupts our family routines, and places an unfair burden on working parents. This issue is so significant that even our trustee acknowledged it, calling it what it is—likely "a computer glitch." Yet, despite recognizing the flaw, there has been no correction or reconsideration. I urge the board to listen to the real voices behind these numbers and plans. Families deserve thoughtful, compassionate decision-making, not arbitrary disruptions. I ask for the opportunity to explain the full extent of these impacts and to work toward a more reasonable and family-centered solution.
