

Name: Geoffrey Solomon

Brief summary of issue or topic of discussion:

Concerns around OCDSB Elementary Review Proposal:

- Urban wards disproportionately impacted.
- My families example, living 2.5 blocks from Elgin St. Public and proposed to be moved to Cambridge over 1km away not in our community.
- Mental health concern post covid on kids
- concerns around costing, will this save money?
- Concern around increasing risks of kids on new proposed routes e.g., now my kids would have to cross Bronson.
- Major view that kids should be grandfathered, the urban wards should be removed from the larger proposal, and the OCDSB should take a community approach to specific wards heavily impacted doing a phased in approach if needed.
- Concerns about OCDSB board proposal and Centretown and urban residents being disproportionately impacted.
- concern around community based zones proposed not representing community
- lack of costing and planning details
- concern around Somerset representation from [REDACTED]
- concern about this plan not being community focused.
