

Name: Jennifer Dimoff

Brief summary of issue or topic of discussion:

This delegation offers constructive scientific perspectives on the methodology used to gather and analyze the 10,000+ additional consultation responses received after the initial EPR recommendations. We will provide research-based insights on both interpreting this new data and improving OCDSB's future consultation processes to ensure more inclusive, informative, and actionable public input. Our findings aim to inform potential revisions to the EPR recommendations and the April 11th implementation plan.
